

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

The Masonic Classification herewith presented is the result of some twenty-two years of practical experience in the largest masonic library in the world—the Library of the Supreme Council, 33rd Degree at Washington. This Library, in addition to its thousands of items on Freemasonry and related societies, contains also thousands upon thousands of general works in all branches of literature. These latter works are classified according to the well-known Dewey Decimal System, but this system provides no classification of freemasonry, assigning one class only to the subject, which class is practically incapable of subdivision. The scheme which I have devised and which is in successful practical operation, provides for nearly four hundred classes and sub-classes.

Practically all masonic libraries contain much general literature, but as they specialize on freemasonry, it becomes necessary to provide some system which will allow of their classification independently of the general library. Many libraries use the Dewey Decimal System, and I have devised the present scheme to prevent confusion, not only in the classification, but also in the catalogue card number, the book label number, the shelf guide number, and in various other ways, the letter "M" (Masonry) arbitrarily prefixed to the digits, always indicating the card, the book, its label, and the shelf-guide, as of masonic import.

The entire range of masonic literature is divided into ten great classes, somewhat similar to Dewey's ten great classes of general literature. These ten classes are subdivided again and again to suit the requirements of the literature on a given subject. For example, if we have a general history of freemasonry, it goes in class M10. If it is a history of Freemasonry in Europe, it goes in class M17.940, the M17, indicating that it is a geographical division of masonic history, and the 940, indicating that it is a history of Freemasonry in Europe, the 940 being Dewey's notation for Europe. Again, take the class M20, which is Customs and Paraphernalia. Any general work on the subject would go in this class, but if the library possessed literature on the Obituary Rites of freemasonry, it would go in class M20.01; if it had works on Paraphernalia, they would go in class M21; Jewels and Medals would go in M22, and so on.

I am familiar with several schemes of masonic classification, made by interested masons, but they utterly fail to be of any practical value. Several public libraries have attempted classifications, but the lack of knowledge of the subject, has been the cause of some grave errors. For instance, the Library of Congress, in its treatment of Scottish Rite Literature has placed everything of this nature under the caption "Cerneau Organizations", whereas every intelligent mason knowing that "Cerneauism" is regarded throughout the masonic world as spurious and clandestine, would never look for the extensive literature of the Scottish Rite under this heading; and as this same library in its classification provides for "Non-recognized, Clandestine Masonry", Cerneauism would be properly looked for here. This is simply *one* of the errors of the Library of Congress classification.

The Subject Index following the classification, is a most important and useful feature, giving to the reader when in doubt the exact location of a given subject, and aiding the librarian in cataloguing his books, showing him to what class the books should be assigned and familiarizing him with a knowledge of the system.

WILLIAM L. BOYDEN, 33° Hon.°
